- HTML, CSS, JavaScript
- Bootstrap
- React.js
- Node.js
- Express.js
- MongoDB
- MySQL
- Frontend Developer
- Backend Developer
- Full stack Developer
- MERN Stack Developer
- MERN Stack Fresher
- Web Developer

---

## EDUCATION

**BSC - Computer Science**
2021 - 2024
AVVM Sri Pushpam College
CGPA - 6.5

**H.S.C**
Passed out year : 2021
Vaduvur Higher Secondary School
CGPA - 8.7

---

## CERTIFICATIONS

- Zen Class Full Stack Developer Program **@GuviGeeks**

## PROFILE

Recent graduate skilled in MERN stack development, with hands-on experience in building responsive frontends using React.js and dynamic backends with Node.js and Express.js. Eager to contribute to innovative projects, leveraging solid understanding of HTML, CSS, JavaScript, and MongoDB to create impactful web applications.

---

## TECHNICAL EXPERTISE

- Frontend Skills - **HTML, CSS, JavaScript, React, Bootstrap**
- Backend Skills - **Node.js, Express.js**
- Database - **MongoDB, MySQL**

---

## PROJECT

### 1.GMAIL CLONE (Full Stack Application)

- **Gmail Clone Development**: Independently designed and developed a Gmail clone website with essential features including inbox, sent items, and drafts. Implemented a responsive user interface (UI) ensuring seamless navigation across devices.

- **Advanced Messaging Functionality**: Engineered robust functionality for sending and receiving messages, utilizing MERN stack technologies (MongoDB, Express.js, React.js, Node.js) to manage data flow and ensure real-time updates.

- **User-Centric Design**: Prioritized user experience (UX) by implementing intuitive UI/UX design principles, enhancing accessibility and usability of the application for a seamless communication experience.
  **Deployment URL** : https://gmailclone1705.netlify.app/

### 2.TODO Application (React.js)

- **Responsive User Interface**: Designed with a responsive UI, the application adapts seamlessly to different screen sizes and devices, providing a consistent user experience across desktops, tablets, and smartphones.

- **Status-Based Categorization**: Users can efficiently manage tasks by categorizing them based on their completion status. This feature enhances organization and clarity, allowing users to focus on tasks that need immediate attention or have been completed.

- **Interactive Task Management**: The application offers interactive features for managing tasks, such as marking tasks as completed or pending, editing task details, and adding new tasks dynamically. These functionalities improve user productivity and task management efficiency.
